PROFESSIONAL SUMMARY

Final year B.Tech CSE student with hands-on experience in data analytics, business intelligence, and Python programming. Built end-to-end analytics projects including a crop health monitoring system (Best Paper Award, ICCSC-2026) and a real-time Power BI dashboard. Proficient in Power BI, SQL, Excel, and ETL pipelines.

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad, India

Expected Graduation: May 2026

Bachelor of Technology in Computer Science and Engineering

SKILLS

Languages & Query: Python, SQL (MySQL, MSSQL), C, C++

Data Analysis: Pandas, NumPy, Matplotlib, Power BI, DAX, Microsoft Excel (VLOOKUP, Pivot Tables), EDA

BI & Reporting: Power BI, DAX Measures, ETL Pipelines, Dashboard Design

Databases: MySQL, Microsoft SQL Server (MSSQL)

Tools: Git, Jupyter Notebook, Google Colab, GitHub, Visual Studio Code, MS Excel

Core CS: DBMS, Data Structures & Algorithms

PROJECTS

AgriCrop – Crop Health Monitoring and Recommendation System

12–13 Feb 2026 

Project Leader | Co-Author | IEEE ICCSC 2026 | Machine Learning | XGBoost | Python | Data Analysis

- Engineered a machine learning-based crop recommendation system by integrating soil nutrient parameters and real-time weather data, performing **data preprocessing**, **feature engineering**, and **predictive analytics** for precision agriculture.
- Applied **XGBoost** for **multi-class classification** and conducted **exploratory data analysis (EDA)** using Pandas and Matplotlib to analyze feature relationships and optimize model performance across **15+ crop types**.
- Led the project and co-authored a research paper accepted at **IEEE ICCSC 2026** and published in **IEEE Xplore**, demonstrating expertise in **machine learning**, **data analysis**, and model development.

Telecom Customer Churn Prediction & Analysis

Sep 2025 

Python | SQL | Scikit-learn | Pandas | Feature Engineering | Machine Learning

- **Architected** an end-to-end **Machine Learning pipeline** in Python using **Pandas**, **NumPy**, and **Scikit-Learn** to predict customer churn, achieving **77% accuracy** and **0.81 ROC-AUC**.
- Engineered custom features (TenureGroup, NumServices) and applied **SMOTE class balancing** to resolve dataset class imbalance and prevent model bias.
- Tuned model hyperparameters via **GridSearchCV** and deployed predictive models using **Streamlit** for interactive analytics and visualization.

E-Commerce Sales Analytics – SQL & Python Dashboard

Nov 2025

Python | SQL | Pandas | Matplotlib | Seaborn | Data Wrangling | Cohort Analysis | RFM Analysis

- Processed and analyzed **100K+ e-commerce transactions** using **SQL** and **Pandas**, performing data wrangling, feature engineering, and **KPI analysis** to evaluate revenue trends and customer purchasing behavior.
- Implemented **Cohort Analysis**, **RFM Segmentation**, **Customer Lifetime Value (CLV)**, and **Pareto Analysis** to identify high-value customer segments and customer retention patterns.
- **Designed 20+ visualizations** and a multi-page **Streamlit** dashboard for sales, customer, product, and operational analytics, enabling data-driven decision-making.

PROFESSIONAL EXPERIENCE

Data Analytics Job Simulation — Deloitte (Forage)

May 2026

Virtual Internship Simulation – Participant

- Completed a real-world data analytics job simulation covering data interpretation, dashboard analysis, and business **root-cause analysis** in a consulting context.
- Analyzed business datasets and produced structured findings aligned with consulting-style deliverable formats.

CERTIFICATIONS

Data Analytics Job Simulation – Deloitte (Forage)

SQL and Relational Databases – IBM Database Fundamentals Certification

Introduction to Cyber Security – Infosys Springboard Certification

ACHIEVEMENTS

- **Best Paper Award** — ICCSC-2026 (IEEE UP Section Co-Sponsored), ABES Engineering College; AgriCrop paper on crop health monitoring selected from 200+ submissions.
- Presented data analytics research to **50+ academics and industry professionals** at a peer-reviewed international conference.
- Solved **100+ SQL and analytical problems** on LeetCode and HackerRank, mastering complex query architecture and data manipulation.
